

Food 4Thought

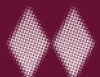

How Clean and Pure
is Your Compressed
Air, Water, Steam
and Gas?

As a manufacturer and processor of food and drink products we don't need to tell you how exacting the food hygiene laws are in the UK.

IATT can offer you a guaranteed solution for clean Compressed Air, Water, Steam and Nitrogen and Other Gases.

Service Excellence

The IATT Guaranteed Solution

IATT are not only suppliers of products, we offer an independent approach to the selection, supply and installation of filtration and purification technology. Our in-depth knowledge and application expertise ensures that you, the manufacturer can rely on us to provide a guaranteed solution which complies with legislation and regulations, is cost effective, fit for purpose and will improve your process productivity.

Purification of Compressed Air and Gases

IATT offer a comprehensive range of:

- Particulate and Coalescing Filters to remove solids and water/oil liquids and mist aerosol from air and gases.
- Adsorption Filters remove oil and hydrocarbon vapours.
- Refrigeration and Adsorption Dryers remove water vapour and provide down to -40° C pressure dew points.
- Microbiological Filtration ensures sterility and removes biological hazards

Nitrogen Gas Generation

IATT offer a less expensive, safe and environmentally sound solution compared to traditional gas tank/cylinder storage. Using our nitrogen gas generation solutions we can provide systems from small lab based systems to large turnkey solutions that generate gas from atmospheric air.

Process and Liquid Filtration

From water, to steam, fruit juice to food ingredients, IATT have a filtration solution to provide you with clean, particle free fluids and liquids.

Utilising the extensive range of Graver Technology Process and Liquid Filtration products we can provide depth and pleated media filter cartridges in a wide range of media types and micron ratings typically from 0.2 to 75 microns with a wide flow rate capability.

Onsite Survey and Process Validation

As well as our Free Onsite Survey to determine your filtration and purification needs, IATT also provide full Process Validation to help you comply with the requirements of HACCP (Hazard Analysis Critical Control Points).

Service Excellence

Products and Technology are only a part of what we offer you - IATT are proud to provide Service Excellence - which starts from your very first contact with us, through the rapid supply and reaction to your requests for products and spare parts to maintenance and servicing of your equipment.
